Ram Patil

Software Engineer | DevOps Engineer

Sacramento, CA - Open to Relocation • **Email**: patil.ram4021@gmail.com • **Phone**: (916) 750-9381
LinkedIn: https://www.linkedin.com/in/rampatil4021/• **GitHub**: https://github.com/Rampatil2104 • **Portfolio**: www.rampatil.com

Profile Summary

Results-driven Software Engineer specializing in distributed systems, cloud infrastructure, and DevOps automation. Experienced in architecting scalable backend systems using .NET, Node.js, and cloud platforms (Azure, AWS), with hands-on expertise in CI/CD, containerization, and microservices. Demonstrated impact through cost optimization, system performance improvements, and automation of deployment pipelines. Strong foundation in system design, APIs, and full-stack development with React and modern web technologies.

Technical Skills

Languages: C++, C, Python, JavaScript, Go.
Technologies/Tools: AI, LangGraph, LangChain, Node, Next, React, FastAPI, Azure, AWS, GCP, Docker, Jenkins, Terraform, Ansible, Nginx, PostgreSQL, MySQL, SQLite, Git, Jira.
Concepts: Frontend, Backend, Fullstack, Cloud Computing, Cloud Infra, DevOps, version control, API, Authentication, System Design and Development, Distributed Systems, NoSQL/SQL Databases, Containerization, Agile Methodologies, Kanban, Scrum, Microservices, CI/CD.

Projects

NemoAI (Calhacks 12.0) | https://github.com/Rampatil2104/calhacks-nemo

- Developed an autonomous AI agent that can join live meetings, interpret context, and perform user actions using LangGraph and the Model Context Protocol (MCP).
- Integrated real-time transcription through with ngrok tunneling and the Recall API, enabling live speech understanding and command execution.

Tools / languages used in the project: LangGraph, MCP, Python

Quail | quail.dot.ca.gov

- Developed a Full Stack web application for Caltrans to make Caltrans geotechnical construction quality assurance test data accessible in digital format and assist engineers & managers in evaluating test results.
- Integrated real-time transcription through with ngrok tunneling and the Recall API, enabling live speech understanding and command execution.

Tools / languages used in the project: React.js, Node.js, Oracle DB, Docker, Kubernetes, Jenkins.

Work Experience

Solutions Engineer — Jan 2026 - Present

California Department of Toxic Substances Control (DTSC) — Sacramento, CA

- Spearheaded migration of the Flux grant management platform from DocuSign to Adobe APIs by architecting scalable .NET backend services, delivering ~$100K in annual licensing cost savings for the California Department of Toxic Substances Control (DTSC).
- Built end-to-end Azure DevOps projects, configuring Boards, Git repos (develop/master), and CI/CD pipelines (YAML/classic) with gated builds, Playwright tests, and 4-stage deployments (Dev/Test/UAT/Prod) using App Services, slots, approvals, and security scans, reducing manual release effort ~75% (~30 hrs/month/team).
- Developer for the Cost Recovery Management System project, enabling efficient finance tracking of state toxic waste projects. Delivered secure, scalable APIs with .NET Core and Azure B2C authentication, built a dynamic UI with Kendo UI and SignalR for real-time updates, and streamlined reporting through SSRS and automated ETL processes in SSIS.

Software Developer Intern

May 2026 - Dec 2026

California Department of Transportation (Caltrans) Sacramento, CA

- Developed "Quail", a full-stack web application using React.js, Tailwind CSS, Node.js, and Oracle DB, streamlining data workflows and enhancing user experience.
- Implemented secure XML upload functionality, eliminating 30+ hours/month of manual data entry and automating backend integration.
- Integrated SAML-based Single Sign-On (SSO) using Caltrans' internal authentication system (CT Pass), collaborating with cross-functional security teams to streamline access and enhance authentication reliability.
- Optimized React.js UI components, improving page load time by 30% through performance tuning and component refactoring.

Web Developer Intern

Jan 2024 - Dec 2026

California State University, Sacramento Sacramento, CA

- Redesigned and upgraded over twenty T3/T4 webpages using CSS and Web CMS to improve UI consistency across the platform, accelerating the "My Sac State" college website launch timeline by 35% compared to the original projection.
- Developed Reusable React components, focusing on pixel-perfect UI and efficient CSS pre-processing to obtain ADA compliant websites.
- Used Azure DevOps Boards to manage tasks, track bugs, and coordinate agile sprint workflows within the development team.

Education

Masters in Computer Science | California State University Sacramento| Sacramento, CA Dec 2025

Bachelors in Computer Science | Savitribai Phule Pune University | Pune, CA May 2023
